Screens
Standard & Ritz

- Highly effective
- Sleek and slender image
- Increased privacy
- Prevents people looking in
- Excellent view to the outside
Screen is a flat suspended sun protection, externally covering your window. The special fabric fitted close to the window means sunlight has little or no opportunity of penetrating the space, even acutely angled sunlight. A screen-covered window also keeps the heat on the outside, protects your interior finishes against discolouration and at the same time ensures an increased level of privacy.

The Verano® screens are available in various models and dimensions. Each model offers different qualities, guaranteeing we can supply the perfect solution for your specific situation.

### Standard screens (V575, V585 and V595)

The standard screen is an effective and economic basic model. With a standard screen, the fabric slides down between two guide bars. The screen’s type number reflects the dimensions of the housing; the larger the housing, the higher and wider the maximum dimensions of the screen will be (see table below). Screen types V540, V585 and V595 can be delivered with either a bevelled or a squared housing.

Manual operation
Below you can see how the screen may be operated manually.

Powered operation
Powered operation is available for additional convenience of use with or without remote control. Your Verano® dealer will be pleased to inform you of the various options.

Ritz screens (V540, V599, V599 XL and V599R)
Ritz screens are fully zipped into the guide bars at the sides. This ensures a windproof system, with the fabric always in tension. Chinks of light between fabric and guide bars are eliminated completely, blocking out the light entirely and at the same time protecting against insect penetration. The V540 type is a basic model; ideal for smaller and medium sized windows. The V599 is intended for larger windows and features an individual, larger, stylishly designed housing.

Max. fabric height without seem:
Schots fabric: colour dependent 1700 or 2670 mm
Glasvezel: colour dependent 2500, 2700 or 3200 mm

The standard screens have a maximum fabric surface of 6 m². Screen widths and heights greater than shown in the table are perhaps possible, but are not covered by the manufacturer’s warranty. This also applies to fabric greater than 6 m².
Screen fabric
Verano® has its own, carefully selected colour collection for screen fabrics. This collection uses only the highest quality fabrics, all of which are fire retardant materials. For a complete overview ask for our Metro Colours leaflet. The top and bottom seams of up to 3m¹ can be made from 1 piece, ensuring fewer pleats in the fabric.

Warranty
You purchase a screen to enjoy it for many years to come, problem free. To satisfy this, all our screens are produced from the very best quality materials, which enables us to offer you a five year warranty. Please ensure that your Verano® dealer supplies you with all the required information beforehand.

CE Marking
The CE marking is your guarantee the product meets all current European (safety) standards.

About Verano®
Verano® products are recognised for their outstanding quality, ease of use and are tailor made for you.

Comfort is one of Verano®’s key considerations. All our sun protection and screening products are designed to ensure life is made easier, relaxing and more pleasurable.

www.verano.eu features our full range of products for interior and exterior sun protection, outdoor living, roller shutters and garage doors.
