SeceuroMesh is a near-invisible protective barrier offering cost-effective, unobtrusive protection for vulnerable windows.

SeceuroMesh has been specifically designed to offer a high security solution for buildings under threat from smashed windows and vandalism.

Constructed from 2mm thick galvanised steel and encased in an aluminium frame, the matrix of 4mm diameter perforations provide 60% vision.

This perforated design gives the appearance of tinted glass which is unobtrusive and blends into the look of the building.
Durable
The galvanised steel mesh is powder coated to protect from rust offering a long-lasting security solution.

Secure & strong
Constructed from 2mm thick cold rolled galvanised steel and encased in an aluminium frame, SeceuroMesh provides high residual strength and rigidity. When fitted to steel, brick, concrete or hardwood timber SeceuroMesh is compliant with LPS 1175 Level 1.

Unobtrusive design
The 4mm diameter perforated matrix gives the appearance of tinted glass and allows for 60% vision. This provides an unobtrusive look both inside and out.

Cost effective
SeceurMesh provides a cost-effective high security solution.

High visibility
SeceuroMesh offers a perfect solution where visibility is key. Offering 60% vision, the mesh tricks the eye giving the appearance of tinted glass.

Versatile
Suitable across a wide variety of applications including public and private buildings and domestic and commercial properties. The aluminium frame can be powder coated in any RAL or BS colour to blend with the look of the building.

Bespoke design
SeceuroMesh is made to measure to ensure a seamless fit with the window frame. The mesh can incorporate cut-outs to accommodate hinges, door handles etc.

Low maintenance
SeceuroMesh is the ultimate low-maintenance security solution. Once fitted the mesh will need very little maintenance.

SeceuroMesh is suitable across a variety of applications including:
- Educational establishments
- Shopping centres
- Banks
- Factories
- Commercial properties
- Offices
- Domestic properties
- Care homes
- Hospitals
- Public buildings.
